Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I., claim(s) 1-24, drawn to an airway device.

Group II., claim(s) 26-32, drawn to a method of manufacturing an airway device.

The inventions listed as Groups I. and II. do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The inventive concept of Group I. appears to be drawn to the airway device including a substantially uniform airway tube associated with a non-inflatable cuff formed of a material with certain Shore hardness. The inventive concept of Group II. is materially different from that of Group I. in that details are drawn to the method of manufacture including the specific step of providing a mould and the introducing of a liquid plastics to the hollow interior of the mould and further optionally introducing a second liquid plastics to the hollow interior of the mould. Accordingly, the inventive concept for Group I. is materially different from that of Group II which would lead to diverging fields of search.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
